

SAFER INHALING SUPPLIES

BRASS SCREENS & PUSH STICKS

Use new screens every time.
Used screens can shrink or shred
making them loose in a stem.

Brass Screens are used in straight stems to:

- Hold drugs in place in the stem.
- Block hot particles from being inhaled into the mouth and throat.

Brass screens are a safer and better-quality choice than Brillo®.

There is no 'one way' of packing screens. Push sticks are used to position screens inside the straight stem. Try different styles of packing until you find one you prefer.

YOUR HEALTH MATTERS

Use safe. Carry naloxone.

Talk to your harm reduction site about the supplies they have available.
